

STUFFING BOX Slurry Pump Parts For Centrifugal Slurry Pump ISO Certify

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: horizontal-slurrypump.com
- Certification: ISO
- Model Number: OEM
- Minimum Order Quantity: 1 set
- Price: based on quantity
- Packaging Details: wooden case
- Delivery Time: 15days
- Supply Ability: 200sets monthly

Product Specification

- Type: 078 STUFFING BOX For 6/4D-AH
- MOQ: 1 Set
- Original: China
- Pump Model: 6/4D-AH
- Inlet: 6inch
- Outlet: 4inch
- Usage: Slurry, For Pumps
- Theory: Slurry Pump Parts
- Highlight: **slurry pump spare parts**

STUFFING BOX 078 Slurry Pump Parts For 6 / 4D-AH Centrifugal Slurry Pump

Overview

The STUFFING BOX 078 Slurry Pump Part is an important part of the stuffing box seal.

The stuffing box seal is composed of packing box body, packing, gland, bolt and other basic parts. The packing placed between the box body and the rotating shaft is radially extended under the axial force of the bolt force and the gland, so that the packing is tight. Adhered to the periphery of the rotating shaft, the lubricating oil added from the oil cup will form a very thin oil film between the packing and the contact surface of the rotating shaft when the shaft rotates, which not only has lubricating effect, but also prevents the medium in the kettle from escaping and Infiltration of gas outside the kettle.

The sealing form of the Centrifugal Slurry Pump mainly includes packing seal, auxiliary impeller seal and mechanical seal. The packing seal can be used together with the auxiliary impeller seal. The packing sealing structure is simple, low in cost and easy to maintain, and is widely used in various types of Centrifugal Slurry Pumps.

Application

The vertical sump pumps are designed for delivering corrosive, large particle and high density slurries. The pumps are widely used in metallurgy, mining, coal, power plant, building materials and environmental protection industrial departments, etc.
